Abstract (en)

[origin: DE19729773C1] A process is disclosed for rolling a metal strip, in particular a steel strip, in a cold rolling train (2) followed by an annealing section (3) and a temper pass section (4). The outgoing or set thickness of the metal strip when it leaves the cold rolling mill (2) is determined as a function of the set hardness and set thickness of the metal strip when it leaves the temper pass section (4).
