Abstract (en)

[origin: WO9902352A1] The invention relates to a flat material (1) presented in the form of an endless band and/or sheet, comprising at least one break-off line (2, 4) along which the material can be more easily separated. According to the invention the break-off line (2, 4) is created by cutting completely through the material along the break-off line (2, 4). The invention also relates to methods, devices and punching elements for producing the flat material provided for in the invention.
