Abstract (en)
[origin: WO9901629A1] Flooring method wherein a number of floor elements (1), such as boards, planks, panes, sheaves, blocks, strips and the like, are joint to a floor. The floor elements (1) are provided with tongues and grooves and are joint by means of these. The floor elements are (1) subsequent application of glue in the grooves joint to columns (4), which columns (4) gradually are joint to units (2) corresponding to the floor width. The units (2) comprises at least two, preferably three, rows (3) of floor elements (1). The floor elements (1) in the units (2), or preferably in the columns (4), are gradually pressed together by means of a compression arrangement (10). The invention also refers to the use of a compression arrangement (10) in a flooring method.
