Abstract (en)
[origin: WO9902998A1] Device for monitoring one or more meters for supplied energy or another product or service, at least comprising one or more sensor assemblies (7, 8, 9) for monitoring the meters, a display unit (2) for displaying data and a data-processing unit which is designed to display the information signals which are obtained using the sensor assemblies (7, 8, 9), by means of the display unit (2), as the actual consumption within a certain period of time and, at the same time, to display the consumption in a corresponding period from the past, as well as a sensor assembly suitable therefor.
