Abstract (en)  
An infant carrier comprising a main body portion. The main body portion (14) has a back (20) and a front (22) with a bottom portion (24) therebetween. The front (22) terminates in upwardly extending shoulder straps (26). The main body portion has sides with one edge (28) releasably coupled and with leg holes (32) located between the areas of coupling and the bottom portion. A back support (36) is formed in a U-shaped configuration and has its upper edges extending in an inverted U-shaped configuration for positioning over the shoulders of a child care provider and a waist band (40) at the lower end for positioning about the waist of the child care provider. The waist band (40) has free ends (42) with a separable buckle (44) therebetween and with the shoulder straps (26) terminating in releasable buckles (46) adjacent to a central section of the waist band. Further included is a buckle (74). The buckle has a fixed portion (76) coupled to the main body portion at a lateral edge and a movable portion coupled to the main body portion adjacent the front edge to effect the opening and closing of the main body portion adjacent one lateral edge.
