Abstract (en)
[origin: EP0995829A1] The yokes (1,2) are joined via articulated caps (4) and the drying grids (5-7) are tiltable. Each drying grid (5) consists of two grid strips (8,9) and drying rods and is mounted on the fixed yoke (1) by means of a bearing bore (14) so that it tilts round an axis (15). The grid (5) is mounted on the tilting yoke (2) via an articulated tube (16) and tilted and shifted out of a drying position.
