Abstract (en)

[origin: EP0995848A2] The appliance has a cylindrical container (11) with a pivoted lid (12), and a carrier frame (13) for a suction hose reel (16) with hose (17), and a high pressure hose reel (14) with hose (15). The suction hose is flexibly connected to the container. The frame is fastened pivoted to the pivoted lid via hinge connections (24,25), so that it can be pivoted to either side. A unit has adjusting lever and reversing lever and the adjusting lever can be moved into neutral to block both hinge connections.
