Abstract (en)

[origin: EP0995862A2] The geared drive mechanism (1), for insertion into an opening in the hollow profile of a window or door frame, has a swing spacer (20,20') with the threaded drilling (28) for the mounting screw (61). The thickness of the spacer (20,20') is equal to or smaller than the thickness of the section of the mechanism (1) gripping within the hollow profile, or the width of the head (3) of the housing (2).
