Abstract (en)

[origin: EP0995875A2] A rubber elastic sealing profile (13) is provided round the casement (11) or fascia frame (12) and supports the magnetic means which are relatively movable to a restricted amount to hold the magnetizable parts or further magnetic means of the frame or casement sealingly against the sealing profile. The magnetic means or magnetizable parts can be fixed with the rubber elastic sealing profile on the overhang (17) of the frame or casement in a seal holding groove.
