Abstract (en)

[origin: WO9904121A1] The inventive holding device for fixing pins (1) for doors (10) is provided with boreholes (8 and 9) for receiving a fixing pin (1) and an adjusting part (3). Said adjusting part (3) is configured as a threaded bolt and has a collar (5) at its end. Said collar (5) engages in a groove (7) in the free end area of a fixing pin (1) of the hinge (2). The fixing pin (1) is axially displaced when the adjusting part (3) is moved, thus enabling an accurate setting initially and subsequent readjustment.
