Abstract (en)

[origin: EP0997211A2] The method for manufacturing corner connections comprises straps which are punched out of cladding elements after moving of the corner connector (9). The corner connector is gripped by a hand operated dryer and has a clamping head (1) formed on a clamping arm (4), with further clamping arms connected to a tension cutter (6) via a joint (7) working with a blade (5). An Independent claim is included for a device for implementing the method.
