Abstract (en)

[origin: EP0997598A1] The screw guide is connected to the back of a door lock bolt head to ensure sliding connection of an operating rod (3) with the head. It has a drilled guide pin communicating with an opening in the head for the passage of a fixing screw. The guide screw comprises fastening tabs (27) which engage with the side walls (7,8) of the rabbet encircling groove (4) to hold the bolt in the longitudinal and transverse position.
