Abstract (en)
[origin: WO9904875A1] An amusement device as well as methods for operating said amusement device, which comprises an elongated track and a carriage which is movable over said track. The carriage is moved in a forward direction of transport over the track to a predetermined end position. The forward movement is stopped near the end position, at least one seating part of the carriage provided with seats is pivoted through 180 DEG about a pivot axis extending transversely to the track, and the carriage is moved in a backward direction of transport away from the end position, whereby the front part of the carriage is positioned at the front again, seen in the direction of transport.
