Abstract (en)
[origin: WO9906975A1] An alarm assembly for use in child equipment intended to be operated by an adult, comprising an actuator (10) for actuating the or part of the equipment, first sensing means (18) operable to sense initial movement of the actuator, an alarm drive unit (22) coupled to the first sensing means and operable to issue an alarm signal on sensing of initial movement of the actuator, and second sensing means (20) operable to sense a further predetermined movement of the actuator and coupled to the alarm drive unit, the alarm drive unit being operable to prevent or stop the alarm signal on sensing of the further movement of the actuator.
