Abstract (en)
[origin: EP0999616A1] Lighting device, e.g. a third brake light for vehicles, including a supporting body, a plurality of lamps connected by a supply circuit and a closure element provided with an external lens. The supply circuit in turn includes two identical semi-blanked plates. The plates have opposing symmetrical ends, each provided with fins folded to form flexible extension pieces adapted to slidably receive the contacts of a connector in order to connect the supply circuit to an external supply line. <IMAGE>
