Abstract (en)

[origin: EP0999665A2] Data for the selection are supplied via a mobile data carrier such as a chip card. The data relate to a planned route of a motor vehicle. One of several data sets representing a route or area are stored on the data carrier can be selected. The data are based on a local database used for coding and decoding messages. The data may also include details about directions. A device for providing data on a mobile data carrier for selecting digitally encoded messages is also claimed.
