Abstract (en)

[origin: WO9905932A1] The invention relates to a container for storing contact lenses (6). The inventive container can be filled a liquid (2) for wetting the contact lenses (6), and consists of a bottom container part (1) and a top container part (8). Said top container part can be closed on the bottom container part (1) in such a way that the container is water-tight. A receiving part (5) for receiving the contact lenses (6) is located in the bottom container part (1). A lid part (10) which is provided in the top container part (8) interacts with the receiving part (5) in the bottom container part (1) when the container is closed.
