Abstract (en)
[origin: WO9904893A1] The invention relates to a receptacle (1) for personal hygiene products containing active agents, in particular solar protection agents. In this receptacle, a base substance and an active agent concentrate are stocked in separate areas (2, 3). Before use, they are brought together in a mixing area, in an adjustable mixture ratio, where they are mixed by mixing elements (6). The resulting homogenous mixture is then actively conveyed to the output (5).
