Abstract (en)

[origin: FR2767125A1] The invention concerns an installation for conveying (1) objects (2) by air flow such as, in particular bottles and/or flasks, having at least one line for transferring (3) said objects (2), means (4) for loading said transfer line (3) and blowing means, for projecting an air flow capable of driving said objects (2), consisting of first blowing means (5), provided at least partially at said loading means (4). The invention is characterised in that the first blowing means (5) are removable relative to said loading means (4), independently of the transfer line (3).
