Abstract (en)
[origin: WO9906480A1] The invention concerns a white, light-coloured or coloured rubber composition, devoid of carbon black, usable for making colour tyres or rubber articles designed for such tyres, comprising at least (i) a diene elastomer, (ii) a reinforcing white or coloured filler, and (iii) an antidegradant, photostable and non-staining relative to said composition, consisting of a N-phenyl-maleimide derivative of formula (1) in which: R<1> and R<2>, identical or different, represent hydrogen or a halogen; Ph represents a phenyl group, substituted or not; Ar represents an aryl group, substituted or not, with 6 to 12 carbon atoms.
