Abstract (en)  
[origin: WO9906643A1] The invention concerns a lock and key system for coupling a first part (5), comprising a groove (4), with a second part (10) also including a groove (9). The lock is formed by a locking element (2) capable of being inserted into the first part (5) groove (4). A staple (3) connected to said locking element (2) is urged to fit, in locking position, into the second part (10) groove (9) and can be moved by means of the key (12) to be placed in a releasing position, wherein it no longer co-operates with the second part (10) groove (9).
