Abstract (en)
[origin: FR2766949A1] The invention concerns a slot machine with in-built security system, comprising means for payment by smart card (300), a smart card reader-validator (200) and means for managing (300, 400) credits available for the games. In order to avoid all possibility of fraud concerning sums actually won at gambling, the system comprises control means (200, 450, 300) capable of recording on a player's card (300) data representing (D) games specific to said card and capable of verifying said data. The invention is applicable to slot machines.
