Abstract (en)
[origin: EP1000874A2] The pressure vessel has two chambers (e.g. 1) sealed from each other for the storage of different fluid or viscous products. It issuing device (11) has a common valve plate (3) fixed to an insert (2). The valve plate is made of a non-adhesive plastic such as a polyolefin, possibly halogenized, , with an issuing valve (8, 9) for each chamber. An O-ring (4), loaded by a clamping ring (5), provides the seal between the valve plate and the insert.
