Abstract (en)
[origin: EP1001125A1] The sliding doors comprise two or more door panels (2,3) movable along parallel tracks by fitments (4,5). One fitment (4) has a panel holder fixed on same and the other fitment (5) has a movable panel holder which comprises two panel supports (14) mounted side by side in the displacement direction and movable transversely to same. One arm (16) of an elbow lever (15) which is supported by its other arm (18) on the fitment engages on the panel supports. A swivel mounted setting lever (12) is attached by a bracket (19) at the elbow joint (20) of the one elbow lever (15) and both levers are coupled together by a synchronizing rod linkage (21).
