Abstract (en)
[origin: EP1001130A1] The motor has a planetary gear mounted between the rotor and drive shaft. The planetary gear housing consists of a beaker-shaped part (6) attached to the drive-side end of the stator. The internal surface of the cylindrical part of the housing has integral teeth and a plate-shaped hollow bearing wheel (8) is pushed onto the outer ring of the drive-side ball bearing (4).
