Abstract (en)

[origin: EP1001399A2] The device is for fixture to a support plate of a self-supporting cassette containing price and/or product information, with at least one aperture (4) in the support plate (3). On the rear side of the cassette per aperture is at least one fixture device, which comprises two sprung-located holding clamps (5a,5b) for engagement in the correspondingly formed apertures in the support plate. The aperture is round, rectangular or quadratic. The cassette is formed in two parts and comprises a rear wall (7) and a view container with individual view compartments for receiving price and/or product information.
