Abstract (en)
A connector includes a plug having a first plurality of terminals; a receptacle having a corresponding second plurality of terminals which are connected with the first plurality of terminals, respectively, when the plug is connected with the receptacle; each of the second plurality of terminals, which is connected with a corresponding one of the first plurality of terminals when the plug is connected with the receptacle, includes a plurality of sub-terminals formed independent of one another so that the plurality of sub-terminals are electrically connected with one another via the corresponding one of the first plurality of terminals when the plug is connected with the receptacle. <IMAGE>
