Abstract (en)

The grinding machine has a rotor (3) and a stator (4) that can be generally aligned parallel to the rotor and mounted at a radial distance from its axis. The stator can be moved back and forth on a bearing (7) whilst generally maintaining its alignment wrt. the rotor. The stator and its attachment are commonly linked to at least one pivot joint on the housing.

Abstract (de)

Beschrieben wird eine Materialbearbeitungsmaschine mit einem Rotor (3) und einem zum Rotor allgemein parallel ausrichtbaren Stator (4), der radial beabstandet zu seiner Achse gehalten ist, in welcher der Stator (4) unter zumindest allgemeiner Erhaltung seiner Ausrichtung auf den Rotor (3) zu und/oder davon weg bewegt werden kann. <IMAGE>
