Abstract (en)

[origin: EP1002738A2] A storage and transport unit consists of a stack of plate shaped insulating material elements made of mineral fibers, and a water porous sleeve in the form of a film or membrane which covers the top of the stack, the side walls and the base. A storage and transport unit consists of a stack of plate shaped insulating material elements made of mineral fibers, especially rock wool, and a sleeve which covers the top of the stack, the side walls and the base. The sleeve (16) consists of a water vapor porous material in the form of a film, fleece or membrane, and the sleeve has support members (4,5) which act as spacers.
