Abstract (en)
[origin: EP1002907A1] The sanitary fitting has the following constituents:- a fitting body (2) with a stand surface (3), a holding component fixed to the fitting body in the area of the stand surface, at least one through passage for a conduit and at least one holding tongue (10) fitted approximately vertically to the stand surface and running outwards to extend from it. The fixture of the holding component to the fitting body has a tight seat along a surface using a snap-in engagement. The holding component to the fitting body has a tight seat along a surface using a snap-in engagement. The holding component has a centering projection extending downwards from the stand surface. The holding tongue has several projections, the length of which increases with increasing distance from the stand surface of the fitting.
