Abstract (en)
[origin: EP1002915A2] The arrangement has a closure device (1,2) and access control electronics (5) for verification of the authority of a person for access and for driving the closure device. The access electronics are coupled to an attachment device (7) of the closure device as the medium for wireless signal transfer. It has a mortise lock and cylinder for a door, whereby the attachment element is the bolt for the fixing the insertion lock or cylinder.
