Abstract (en)

[origin: WO9908567A1] The invention concerns a twinned kitchen furniture system (10), in particular to be wall-mounted with or without bottom support, comprising lower, upper and hanging cupboards (18, 30), shelves (23) and special zone elements, and fixing elements and a base (15). A wall-mounting system (34, 45, 48, 29, 14) fixes the twin-assembled lower, upper and hanging cupboards, and the shelves (23), at a certain distance relative to a wall (13), and transfers the load taken from the wall (11) and/or from the base (15) system independent of the lower cupboards (18). In the space between the cupboards and the wall is located part of a door-rail system (29, 65, 66, 67, 69, 70) required for the complete vertical opening of the doors (27) above the work top (22).
