Abstract (en)

[origin: DE19735330A1] The preparation of polytetrahydrofuran, tetrahydrofuran (THF) copolymers, their mono- and di-esters, with lower color index, involves polymerization in the presence of telomer and/or comonomer and also hydrogen, using a heterogeneous catalyst. The preparation of polytetrahydrofuran, tetrahydrofuran (THF) copolymers, their mono- and di-esters, with lower color index, comprises polymerizing THF in the presence of at least one telomer and/or comonomer using a heterogeneous catalyst and also hydrogen. SPECIFIC SUBSTANCES - The hydrogen pressure is 0.1-5 bar.
