Abstract (en)

[origin: WO9908119A1] The invention relates to an electricity meter with a housing containing an electric terminal arrangement, made up of terminals and a terminal block, and a printed circuit board, which is connected to the terminals. The terminal block (1) is so mounted that it can be detached from the terminals, and some of the terminals (voltage terminals (2) and possibly additional terminals) are fixed directly on the printed circuit board.
