Abstract (en)

[origin: WO9966531A1] There is disclosed a plasma processing apparatus comprising: a) a chamber having a plasma containing region, the chamber having a dielectric portion; b) an antenna (6) for coupling radio frequency (RF) power into the plasma; and c) a shield member (2) which reduces the level of RF power capacitively coupled into the plasma, wherein the shield member (2) comprises a conducting portion and is positioned between the plasma and the dielectric portion. Also disclosed is a shield member, particularly one for use in the described plasma processing apparatus.
