Abstract (en)
An improved book structure (10) comprising a plurality of bound pages (12) enclosed by a cover (11), at least some of the pages being constituted by sheets which are wider than the cover in the reading direction. Each one of the sheets (12) has a part of the signature (12a) which is pasted to the directly preceding sheet (12) and at least one vertical folding line (13) which forms adjacent sheet sides (12a-12d) which are adapted to be folded onto each other so that the part of sheet that protrudes laterally retracts into the area covered by the cover (11). <IMAGE>
