Abstract (en)

A work machine, especially an industrial truck, has a hydraulic plant that has at least one tank (1) for hydraulic fluid and at least one hydraulic pump (5). The hydraulic pump is located inside the tank. An electrical drive motor (3) of the hydraulic pump is located inside the tank. An electrical drive motor (3) of the hydraulic pump is located outside the tank and a shaft connecting the two is sealed with a shaft seal with respect to the tank. A priority valve is located inside the tank and is fastened by a flange connection to the hydraulic pump.
