Abstract (en)

[origin: EP1004738A2] The door has guide rails and a locking device. A motor is provided on the door for opening and closing the door which is connected to a puller belt via a drive wheel, where the belt is attached to a guide rail located on the door frame. The guide rails (5) are located on the ceiling and floor of the vehicle. The motor is located in the region of the chassis and is attached to a wing arm (8) of the sliding door.
