Abstract (en)

[origin: EP1004751A1] The five components of the steam power plant consist of a steam producer (1), a turbo group with a condensation steam turbine (2) and a generator (3), a water-cooled condenser (4) and a tap steam-heated pre-heater installation and including a fuel storage point (6) are arranged on the same level and in free air presentation. The turbo group together with the condenser, the pre-heater installation with corresponding pumps together with the transformers (7) are so arranged that a gantry crane can be used to paint them.
