Abstract (en)

The invention relates to a tappet in an internal combustion engine. The said tappet according to the invention comprises the following features: a cylindrical body made of light metal; a wear resistant cam receiving plate having roughly equal diameter to an outer diameter of the body; an annular projection being formed adjacent to a circumference of a lower surface of the cam receiving plate; the annular projection is forcibly inserted in an inner circumferential surface of the body; the cam receiving plate is brazed on the body.
