Abstract (en)

[origin: WO9813002A1] An absorbent article including a liquid permeable topsheet, a liquid impermeable backsheet joined with the topsheet and an absorbent core located between the topsheet and the backsheet. The absorbent article also includes a finger pocket located on the backsheet. The finger pocket includes a fixed portion joined to the backsheet and the free portion is preferably free to move away from the backsheet to provide an opening. A diaperer may slide a finger into the opening for controlling at least a portion of the absorbent article while the diaper is being fitted to or removed from a wearer.
