Abstract (en)

[origin: WO9903657A1] The invention relates to a composite material, that is made preferably by gluing, casting or correspondingly as a totally uniform entirety at least of an essentially wood based stiffening substance (1) and of an essentially plastic based binding substance (2). As the stiffening substance (1) there has been used wood, that is usually classified as wood residue (1'), such as branches, crowns, logging residue, coppices and/or like in an essentially elongated form.
