Abstract (en)
The invention described here for which a patent is requested increases the safety level of the people staying (e.g. whilst working or involved in sport activity) in a potentially dangerous situations. The invention described is an intelligent device, which monitors the motion of the person and which in case of situations considered as dangerous, is immediately activated without any mechanical tie to frames or vehicles and without manual intervention.. The said protection is performed by an inflatable overalls, or a "personal airbag", activated by an inertial platform.
