Abstract (en)

[origin: EP1005806A1] The applicator (2) consists of a holder (4) in the form of a container cap, and a flexible tip (8) of a deformable elastic material which tapers towards its rounded free end (8b). The tip has two flat sides (10) and concave (9a) and convex (9b) curved edges with different radii of curvature. When withdrawn from the container the tip passes through a slitted wiper which removes any excess product.
