Abstract (en)

[origin: EP1005827A1] A domestic dishwasher rack comprising a structure formed from shaped rods or similar rod-like elements and carrying at least one device able, by angular movement, to assume different positions in order to increase the versatility of the rack in its use; said device comprises at least two components (9, 13, 16, 17), a first component (13) being supported by the rod or similar structure and able to be angularly moved about a fixed geometrical axis (12), and a second component (16, 17) being carried by the first and able to be angularly moved about a geometrical axis (15) which is parallel to the preceding and pertains to said first component. <IMAGE>
