Abstract (en)
[origin: EP1005883A1] The snowboard is provided with a central cavity (102) defining two longitudinal side beams (103,104). Anchoring points (107,108) are arranged in these side beams in which an intermediate plate (106) for the front and rear feet is fixed (107,108). The intermediate plate is provided in its central support zone overhanging the cavity with anchoring means (109) for fixing the corresponding boot.
