Abstract (en)

[origin: EP1005959A1] With the help of a plug fixing tool having a plug guide (30) the base and the end (23) of the plug guide are fixed together by relative movement in a plane perpendicular to the plug guide axis (21). The base is applied against a receptor support (100) and is fixed by a plug. When the base constitutes a female part to be fixed to the end of the plug guide this has an external annular groove (24) for receiving a base clipping jaw (11).
