Abstract (en)

[origin: EP1005962A2] The cheese (3) is positioned in several layers on top of a horizontal conveyor belt (2) moving towards the transversally guided blade. The blade is fixed inside a U-shaped frame (7) and moved up and down by a rod and piston unit, driven by two eccentrically arranged discs (11,12). The specific arrangement results in a very precise slicing process, conducted with high speed, even when used for slicing several layers of soft cheese simultaneously.
