Abstract (en)
[origin: EP1006242A2] A connecting block in a system of sanitary fittings is identical for all fittings. At least one connection (4) is provided for a water feed conduit as is also at least one connection for an onward feeding mixed water conduit. A dividing surface (2) has through passage apertures and is connected to a connection of the connecting block. Several different sanitary fittings are incorporated and so fitted to the connecting block that they are capable of function. The fittings have a basic body (11) which incorporates the dividing surface from which channels (12) lead to the sanitary fitting parts. The fitting basic body can be connected in four different positions to the connecting block displaced through 180 degrees.
