Abstract (en)

This invention concerns a method for assembling a door having a wing profile (1) and a panel (2) with an inside surface (5), an outside surface (4) and a core (6), comprising the step of removing a part of said panel (2) from around its peripheral edges, said part being able to contain said wing profile (1), characterised in that said wing profile (1) is eliminated from view from a viewing direction being perpendicular to and going outward from said outside surface (4). <IMAGE>
